## MATIZ Furniture Care Guide

Every MATIZ piece is crafted from carefully selected solid teak and designed to last for many years. With a few simple care routines, your furniture will continue to age beautifully and perform as intended.

### Daily Cleaning

- Remove dust regularly with a soft, dry cloth or duster.
- For routine cleaning, use a slightly damp soft cloth.
- For stains, use a soft cloth with diluted neutral liquid detergent.
- Always wipe in the direction of the wood grain.
- Avoid abrasive cleaners, solvents and harsh chemicals.

### Protecting the Finish

- Avoid prolonged exposure to direct sunlight.
- Avoid placing furniture close to heaters or air conditioners.
- Wipe up spills immediately to minimise the risk of staining.
- Use placemats and coasters to protect surfaces from heat, moisture and condensation.
- Periodically move decorative objects to ensure even ageing of the wood.

### Moving Your Furniture

- Always lift furniture when moving it. Never drag it across the floor.

### Periodic Maintenance

- Inspect hardware and fittings periodically and re-tighten them if necessary.
- Place furniture on a flat, stable surface.
- Use the adjustable levellers, where fitted, to ensure proper stability.

### Natural Characteristics of Solid Teak

Solid teak is a natural material. Variations in colour, grain and texture, together with subtle seasonal movement caused by changes in temperature and humidity, are normal characteristics and part of the beauty of genuine timber.

Whenever possible, avoid environments with excessive humidity or extremely dry conditions.

### Scratches and Repairs

Minor scratches and marks are a normal consequence of everyday use. The appropriate repair method will depend on the type and depth of the damage and the existing finish.

Do not attempt repairs without professional advice, as unsuitable products or techniques may permanently alter the appearance of the finish.
