MATIZ Quality Commitment

Designed to last. Crafted with integrity.

At MATIZ, we believe that quality is not something that can be added at the end of the manufacturing process. It is the result of hundreds of decisions made throughout the creation of every piece of furniture, from the careful selection of raw materials to the final inspection before shipment.

Rooted in Barcelona's Mediterranean design culture and manufactured in our own Indonesian factory, MATIZ brings together the best of two worlds. Our ambition is to create furniture that combines timeless design, natural materials and skilled craftsmanship, delivering products that our customers can enjoy with confidence for many years. Every collection is developed to achieve the right balance between aesthetics, functionality, durability and everyday comfort.

Solid teak lies at the heart of our collections because of its exceptional strength, longevity and natural beauty. Every tree is unique and, for that reason, every piece of furniture is unique as well. Variations in grain, colour and texture are not imperfections, but natural characteristics that reflect the authenticity of solid wood and give each product its own individual character.

Rather than trying to eliminate these natural differences, we choose to celebrate them.

Quality begins before production starts

It starts with responsible material selection, thoughtful product engineering and manufacturing processes designed to ensure consistency without compromising the individuality of natural materials.

Our collections reflect the warmth, simplicity and understated elegance traditionally associated with Mediterranean living, while benefiting from the expertise of Indonesian craftspeople who have worked with solid teak for generations.

Throughout production, every piece passes through multiple stages of machining, assembly, sanding, finishing and inspection. Quality control is integrated throughout the manufacturing process rather than being limited to a final inspection. This approach allows us to detect potential issues early and continuously improve our products and manufacturing methods.

Our responsibility continues after shipment

We believe that quality does not end when a container leaves our factory. Supporting our customers after delivery is an essential part of our responsibility as a manufacturer. Whenever a claim or quality concern arises, we work closely with our retail partners and distributors to understand the root cause, provide practical solutions and, whenever possible, use the experience to improve future production.

Our objective is not simply to resolve individual cases, but to strengthen the reliability of every future collection we manufacture.

Built on long-term partnerships

At MATIZ, we also recognise that strong business relationships are built on more than well-made furniture. Trust, transparency and long-term cooperation guide the way we work with our customers around the world. We see every order or project not as a single transaction, but as the beginning of a long-term partnership based on mutual confidence and shared success.

As the manufacturing brand of PT Tara Green Eurasia, MATIZ remains committed to combining Barcelona's Mediterranean design philosophy with Indonesian craftsmanship, responsibly sourced solid teak and attentive customer service.

Our commitment is straightforward:

To manufacture furniture we are proud to build, and to provide the level of quality and support that we would expect ourselves as customers.
